Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20, 21, 26 is rejected under 35 U.S.C. 102(b) as being anticipated by Swift et al (5,464,742).

Regarding to claimed invention, Swift et al discloses the process for testing associations of genes and diseases and further relates to process for selecting a set of families to be used in testing with compared to claimed step of establishing a set of occurrence of events and determining a degree of associations for each occurrence. See col.4, lines 44-53. With regard to claimed step of identifying a subset of the occurrences having degree of association less than a predetermined value, Swift et al discloses step of determining the presence of said disease within blood relatives of the index individuals and selecting individual and a test individual who has the disease see col. 6, lines 3-21. Regarding claim 28, with reference to claimed each physical event having a parameter and each occurrence having a value of parameter, Swift et al discloses index individuals and comparing index individual with blood samples see col. 7, lines 49-68 and col. 8, lines 1-7.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 2863

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,360,184 (claim 1, 6, 7 and 19), 6,460,011 (claims 1, 3, 5), 6,704,686 (claims 1, 3,5,), and 6,738,728 (claims 1, 3, 5). Although the conflicting claims are not identical, they are not patentably distinct from each other because claim at present omits the limitation of establishing a set of possible locations of the physical events and determining a degree of association between the physical events and set of possible locations. However the omission of limitation in the present application is an obvious expedient to the one of the ordinary skill in the art and the remaining elements performs the same function as before. In re Karlson, 136 USPQ 184 (CCPA 1963). Also note Ex parte Rainu, 168 USPQ 375 (Bd. Apo. 1969). Omission of a reference element whose function is not needed would be obvious to one of the ordinary skill in the art.
